

Michael R. Guttery is a Post-Doctoral Fellow in the Department of Wildland Resources at Utah State University (USU). Michael received a B.S. degree in Natural Resources Management from the University of Tennessee-Martin in 2003. He then studied Forestry and Mississippi State University where he was recognized as the Moehring Outstanding Masters Student in Forestry. Upon completion of his M.S. degree in 2006, Michael was accepted as a Ph.D. student in the Department of Wildland Resources at USU. As a Ph.D. student, Michael conducted research on the ecology and management of greater sage-grouse under the supervision of Dr. Terry A. Messmer and Dr. Roger E. Banner. Michael completed his Ph.D. in Wildlife Biology in 2010. Michael's professional interests include population ecology, life history analysis, habitat management, and data analysis. In addition to his own research and teaching obligations, Michael provides assistance to graduate students in the process of designing research projects and analyzing data.
